

# TMBP2-XC

Standard Model

Single-Head Cylinder Type

The largest embroidery space in the single-head machine lineup.  
Stable quality for a wide range of accessories  
from small to large items.

Large embroidery area : 550×600mm

By adding the special frame  
and table of the X-extension unit (option),  
an even wider embroidery range  
can be utilized (550×1200mm).

Applicable for large flags, store awnings, dresses.  
It ensures a wider embroidery space  
by attaching a special frame and table.

## FEATURES

A wide variety optional frame lineup  
for various items.

TMBP-XC is the standard model with basic features.  
This enables to produce stable-quality embroidery on  
everything from small item to large flags, tablecloths,  
curtains or furniture.

## USER-FRIENDLY DESIGN

### 12.1-inch touch panel

The large 12.1-inch operation  
panel-one of the largest in the  
industry-features convenient  
icons and allows you to switch  
the language used for operating  
the machine.

### New thread trimming device eliminates picker

Eliminating the picker makes  
exchanging bobbins easier. It  
also provides more stable  
trimming and a 40% improvement  
over conventional machines in  
shortening thread tails on the  
reverse side of the fabric.

### Design position adjustment function

Even if the fabric pattern is  
slanted in framing, it can be  
corrected from the operation  
panel, with no need for repeated  
attempts to reframe.

## SPECIFICATION(S)

Model	Needles	Embroidery field (length × width)					A	B	C	D
		Border Frame	Wide Cap Frame	Cap Frame	Tubular Frame	Pocket Frame	Width	Depth	Height	Overall Width
TMBP2-X1201C	12	550×600mm	75×360mm	83×180mm	600×550mm	65×100mm 100×75mm	1,286mm	959mm	1,006mm	1,286mm
